Litchfield Landscape Elements America's #1 Choice for Shelters, Pergolas, Gazebos and Architectural Site Furnishings!

Litchfield Landscape Elements began in Litchfield, Michigan in 1973 as a tiny woodworking company manufacturing wood picnic tables, benches and mini-shelters. Accepting design challenges from Landscape Architects, Freelance Designers, and basically anyone who had enough initiative to sketch an idea down on a napkin has been our formula for growth and has made Litchfield the preferred shelter company for designers, landscape architects and architects around the world for over 34 years.

Tube Laser Machine

Plasma Cutter

And that was just the beginning!

In 2008, we relocated to Carrollton, GA. and the home of our new state of the art precision manufacturing facility. We added **High Definition Cutting** abilities to insure precision mounting brackets and ornamental sheet designs. Next, utilizing the nation's largest **Tube Laser Machine**, we have the most precisely cut columns, rafter beams and purlins in the industry. Finally, we have installed the industries best Powder Coating line utilizing a 6 Stage Process that includes the industry's only Stage 4 **Epoxy TGIC Powder Coating Zinc Rich Primers**.

Today, due to years of hard work, loyal dedicated employees and sales representatives, combined with an unwavering mission for success, Litchfield Landscape Elements has transformed into the park furnishing industry leader you'll marvel over in the pages to follow....

Classic Eights

Model 2232-FS 30' x 44' "Classic Eights" Gable End with Fiberglass Shingles.

As they say, "the Classics never go out of style". This statement certainly rings true with respect to Litchfield's line of "Classic Eights" shelters which combines the strength and durability of steel with the warmth of tongue and groove wood roof decking. The "Classic Eights" Gable End, Dutch-Hip and Chalet Style shelters also offer incredible versatility. Their classic 8' bay spacing between columns allows for lengths not found in our 20' bay shelters, without the need for intermediate purlins.

A shelter-length Barbecue Vent is also available for any size Litchfield "Classic Eights" Shelter.

Model 2282-CS 30'X56' "Classic Eights" Dutch Hip with Cedar Shingles.

Model 2282-CS 30'X56' "Classic Eights" Dutch Hip Ceiling.

All-Star Sports Shelters

Model 834060P Custom 40'X60' Pittsburgh Gable End Extreme Sports Cover

Now moving outside our traditional size parameters...

Model 9050 Extreme Sports Covers

Designed to allow outdoor sporting events to continue in the rain or elevated temperatures, the Extreme Shelter is a modified Steel Frame Gable-End Rectangular with elevated roof pitch and raised columns to provide ample clearance for court games. These structures are available in Pittsburgh and Steel Beam models. Extreme Sports Covers can be provided at nearly any imaginable size.

Model 905070P 50'X70' Extreme Sports Cover

Series 9070 All-Steel Dugouts

These All-Steel Dugouts are ideal for use at athletic fields, shuffleboard courts, bus stops or along walking paths as cover for park benches.

Model 9072P 8'X28' Center Post All-Steel Dugout

Model 9071P 8' X 28' All-Steel Cantilevered Dugout shown with Survivor Series Benches.

Model 9051 All-Steel Range Shelters

These sturdy shelters are designed to allow golfers to practice their swings, rain or shine. They also have several other practical uses including bleacher covers, farmer's markets or ball field dugouts. Current sizes available are 12'-6" X 27' and 20' X 60' (shown), but we can custom design one to meet your needs. Gutters are also available.

Model 9057P 20' X 60' All-Steel Range Shelter

Model 9079 Press Box Video Booth Cover

This Custom 8'X36' Pittsburgh Hip-End Rectangular shelter is used as a cover for the video platform at a high school athletic stadium. It features powder coated tubular steel frame, pre-cut painted galvalume metal roof panels, and powder coated steel railings. Litchfield engineers worked with facility managers to fit the structure to their existing announcer's booth, and to verify structural integrity.

Custom Peaked Square with attached Angled "Side-Wings"

The unique angularity of this structure gives it a very modern, "stealthy" appearance which compliments much of the architecture in our modern cities. The Model 8176P Custom 32'X32' Peaked Square Shelter is integrated with two Model 8167P Custom 18'X35' Angled "Side-Wing" Shelters. Features include All-Steel 24 Gauge Metal Roof and Custom Round Banded Steel Columns. Column masonry by others.

This space-saving Center Post Design is engineered with massive custom 12" square columns making the Gable End Center Post Shelter the perfect choice for use as a parking structure and more!

Center Post Gables

The Model 8336P Custom 36'X151' Pittsburgh Gable End Center Post Shelter provides tremendous coverage for vehicles, boats, farm equipment and more with it's massive size and efficient center post design. The Gable End Center Post Shelter features a 24 Gauge Metal Roof and Custom 12" square Banded Steel Columns.

Column masonry by others.

Litchfield's Center Post Gables provide great cover for a wide range of facilities such as:

- Hotels & Resorts
- Marinas
- Military Bases
- Shopping Centers/Malls
- Amusement Parks
- Corporate/Industrial Parking Lots
- Apartment Complexes
- Open Air/Farmer's Markets
- Sports Facilities
- Tourist Attractions
- Campgrounds
- Farms

Litchfield Original Designs

Model 8800P Custom 18' Pittsburgh Triangular Duo-Top Shelter with Western Pattern Lattice and Handrails with Cupola.

Steel Framed Triangle

The Pittsburgh Triangular Shelter comes standard with 24 Gauge Pre-Cut Roof Panels.

As with other Litchfield Steel Framed Shelters, the Triangle is available in a Duo-Top and Tri-Top Roof configurations, in both Pittsburgh All-Steel and Steel Beam models ranging from 12' to 28'.

Peaked Square Shelter

Not your typical square shelter. The Peaked Square utilizes a slanted roof design supported by a ridge beam and four columns of two different lengths which helps create the unique angular look of these shelters. These interesting and fun "Peaked" Square shelters are available in Pittsburgh All-Steel and Steel Beam models with 2"x6" SYP T&G Roof Decking beneath Metal Roofing.

(2) Model 8112-MR29 Custom 12' Steel Beam Peaked Square Shelters with 8" Square Columns and Standing Seam Metal Roof.

Model 8124-MR29 Custom 24' Steel Beam Peaked Square Shelter with 8" Square Columns and Standing Seam Metal Roof. Masonry by others.

Standard Shelter Designs as Garden Gallery Pergolas

Each of Litchfield's standard shelters can be used as the basis for creating a spectacular Garden Gallery Pergola. Simply select a standard shelter shape and we'll create a Garden Gallery Pergola using individual steel slats connected to the steel frame with stainless steel fasteners.

Model 9920 Custom 20' Pittsburgh Garden Gallery Square Shelter with Laser-cut Circle Pattern Lattice.

Close-up view Circle Pattern Lattice and the Pergola's Steel Slats

Model 8216P Custom 16'X24' Pittsburgh Hip End Duo-Top Garden Gallery Pergola with Laser-cut Circle Pattern Lattice. Column Masonry by others.

Variations on a Theme

Model Custom 831220P 12'X20' Pittsburgh All-Steel Gable End School Shelter with a Steeple including a Laser-cut Bell and Gable Enclosures with Ornamental Laser-cutting.

Model 831625-MR29 Custom 16'X25' Steel Frame Glendale Farms Gable End Barn-Style Shelter featuring a Duo-slope Roof, Gable Enclosures with Laser-cut Barn Door Accents, and a Cupola. Designed to match a Barnyard Themed Playground.

Litchfield takes Custom Design to Another Level!

With Litchfield design and engineering you can let your imagination run wild to create a theme shelter to perfectly complement the other elements in your amusement park, water park, playground, or sports complex, just to name a few. Take your park or landscape to another level and allow us to design a custom Litchfield Theme Shelter for you!

Model 8220DP CUSTOM 20'x24' "Steamboat Style" Pittsburgh Hip End Duo-Top Shelter, Ornamental "Smoke Stacks", Lattice, Custom Sized Handrails, Laser-Cut "Life Rings", with Custom Paddle Wheels, and Custom "Smoke Stack" Entry Way with Laser Cut Sign.

Centurion Steel Entry Gates

Litchfield proudly offers our exclusive line of Centurion All-Steel Swing-Style Entry Gates which we custom build in our fabrication shop to the rigid specifications of our customers. The standard swing length is 12'-6" measured from the center of the pivot to the end of the arm but lengths can vary based on need. Maximum "single swing" length is 20' and maximum "double swing" gate length is 40'. All associated hardware including a hinge or hinges utilizing 2-ton bearings and a locking mechanism for either the single or double swing styles are standard. As an option, electrical access holes can be added (at an additional charge) for lighting fixtures or to mount a security video system. Litchfield utilizes laser-cutting technology to create a number of our steel entry gate designs. Select from the attractive design choices shown here or use your imagination and provide us with your own custom design idea!

Centurion Steel Entry Gates are made of welded tubular steel which is sandblasted to a near white condition to remove dirt and oils, then coated with our Zinc-Loc finish to provide many, many years of service. Select from one of our standard Zinc-Loc colors (see page 78) or provide us with an RAL number for a custom color. Custom colors and powder coating is available at an additional charge.

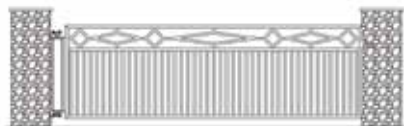

Model CSG-209 Curved Beam Single Swing Gate with Circle Pattern

Fabri-cover Shade Structures

Play it Cool...

...by taking advantage of the UV Blocking Strength of our Fabri-Cover Shade Structures!

HIP Square

Model 4507 Dual Column Umbrella

Kite Shade

Our revolutionary, patent pending, Glide Elbow was designed with you, the owner, in mind. In case of unusual or unexpected weather, such as tornadoes, hurricanes or snow storms, the fabric can be removed quickly and safely.

Easy installation and removal of your fabric is completed with the use of a simple wrench. Our Glide Elbow, not the weather, will be in control of your investment for many years to come.

Just a few of the benefits of Fabri-Cover products include:

- Protect your play equipment investment
- Our fabrics provide up to 80% water repellency
- Your play structures will be cooler to the touch
- Our fabrics provide up to 97% UV protection, which protects children from harmful skin damaging sunburns
- Around sports fields, our canopies provide protection from misdirected, high-flying balls
- Our superior Glide Elbow enables you to remove and re-install canopies very quickly in case of unusually severe weather
- Both our high-gloss powder coated steel frames and outstanding UV block fabrics come in a wide variety of pleasing colors, which you can match as you choose

Model 5163 Straight Box Mall Bench, 6' Pine with In-ground Supports.

Standard Mall & Square Mall Bench

The Standard Mall Bench is available in 6' and 8' lengths, with or without a back. The Square Mall Bench is 2' square, and is available without a back only. Available in treated Pine, Redwood & Oak.

Model 5158 Square Mall Bench in Oak with Surface Mount Plate.

Park Tables

Model 4330 American table in 4X4 Redwood, Single Post In-ground Support.

Model 4309 3' Square American Table in 3X4 Redwood with seat backs and Optional 4390 Checkerboard (shown above right).

Model 4321 4' Square American Table in 3X4 Redwood with seat backs.

Model 4332 6' American Table in 2X4 treated Pine, In-ground Support.

Series 4300 American Tables

The American Table is available in both square and rectangular configurations. The single, center post, buried in-ground, gives a clean, uncluttered appearance. Optional surface mount plate available at an additional cost.

Woods are either treated Southern Yellow Pine or Redwood. Also available in Earthcare Series recycled plastic lumber (see page 57 for details and colors). The original 4X4 tables are offered in 2X4, 3X4 or 4X4 construction. The 3X3 is also available with 3" X 10" planks. The square tables are available with and without seat backs. The 6' rectangular tables are offered with 2X4, 3X4 and 4X4 wood members.

Redwood is finished with Homoclad Sealer to retain the wood's rich, reddish color. The treated Pine is finished with Walnut Brown oil stain.

Model 4340 3' Square American Table in 3X10 Redwood without Seat Backs.

Optional: Model 4390 Checkerboard. Available for most Wood and Recycled Tables(please inquire).

Series 4800 Dearborn Tables

The table measures 38" X 40". Seats measure 19" X 18-1/2". Both are available with surface mount or in-ground supports. The seats are available with or without backs. Tables and seats are sold separately. Offered in Pine or Redwood.

Model 4800 Dearborn Table in Redwood with In-ground Support and (4) Model 4810 Dearborn Seats in Redwood (sold individually)

Series 4200 Rustic Saddle Seat

A Litchfield classic! The seats are supported by a welded steel ring connected to massive 6X6 Pine, Redwood or recycled legs. Top boards are 2X10 nominal lumber. Frame is finished in our standard black or brown enamel. Sizes available are 40" diameter, 4-Seat and 54" diameter 8-Seat models. Available in ADA with minimum seating for four.

Model 4240 54" 8-seat Rustic Saddle Seat Table in Redwood. Shown with Optional Umbrella.

Series 9500 Rustic Park Table

This handy design is available with high tensile 1-5/8" or 2-3/8" outside diameter galvanized pipe frames with 1/8" minimum wall thickness. Table Top and seat frames use 10-gauge galvanized steel. Diagonal braces are 15/16" outside diameter high tensile galvanized pipe. Table top and seat boards are 2X10 nominal #1 Southern Yellow Pine. Available in either untreated or ACQ pressure treated, and recycled plastic. Choose between 6', 8' and handicap-accessible models.

Model 9531 6' Rustic Table with 1-5/8" galvanized pipe frame in treated Pine

Model 9522 6' Rustic Table with 2-3/8" Galvanized Pipe Frame in treated Pine.

Series 4400 Mountaineer Tables

The Mountaineer table is constructed of 4X6 slats in Redwood or pressure-treated pine on a welded steel frame. The seats are available with or without backs (if ordered with backs, designate using "SB" after the model number). The 4' square table is portable only. The 6' and 8' rectangular tables can be portable or permanent in-ground installation. Mountaineer Series tables are available in wheelchair accessible designs.

Model 4428 6' Mountaineer Table in Redwood, Portable.

Model 4444 4' Square Mountaineer Table in Redwood with Seat Backs.

Little Seats

Little Seats are the perfect picnic spots for the kids. We offer the same comfortable, durable designs of our standard Mountaineer or Deluxe Series tables in a reduced scale for smaller appetites.

Model 4445 "Little Seats" Mountaineer Table with 2"X6" Pine slats, Portable.

Model 4419 8' Mountaineer Table in Pine, Portable.

Series 4000 All-Wood Deluxe Table & Series 4100 Traditional Table

Deluxe tables have 6X6 legs and 4X4 cross braces and seat braces, pre-drilled and countersunk. The Traditional tables have 4X4 legs with mortised construction for extra strength. Cross braces and seat braces are 3X3, pre-drilled and countersunk. On both, tops and seats are #1 2X10 nominal boards. Hardware is stainless steel. Available in 6' and 8' lengths. Materials are #1 Southern Yellow Pine, with or without Walnut Brown oil stain, or Redwood with Homoclad sealer. Top shipped assembled.

Model 4063 6' Deluxe Table in Unfinished Pine.

Model 4163 6' Traditional Table in Unfinished Pine.

Wood Litter Receptacles

Model 5750 32 gallon Heavy Litter in Redwood, In-ground.

Model 5480 22 Gallon only Metal Dome Top with Self-Closing Door. Available in Brown or White.

"Elegance in Recycled Plastic"

Litchfield is proud to offer an environmentally-friendly option for our most popular site furnishings. Made of 100% post-consumer plastic, with no industrial waste or other filler added, the Earthcare Recycled Plastic replaces wood components on benches, tables, litter receptacles, planters, bike racks and bollards, and makes up our Series 9900 speed bumps and parking stops.

Earthcare Recycled Plastic is available in a number of attractive colors, which maintain an aesthetically pleasing appearance without finishing.

Survivor Series Furnishings

Regal Series

The Regal Series tables and benches feature tops and seats made with 3/4" #9 expanded metal. They are welded inside a strong 2" X 2" angle iron frame with a protective plastisol coating. Additional bracing under the frames uses 1 1/2" X 1/4" flat steel which is important to keep the rounded corners and frame edges straight and good looking over years of hard abuse.

Shelter Options & Accessories

Perfa-Lite Perforated Metal Roofing

Perfa-Lite is an All-New alternative to fabric roofing. Perfa-Lite blocks up to 44% of harmful UV rays consistently throughout the life of the shelter while allowing plenty of light to shine through for a brighter more pleasant outdoor experience. Perfa-Lite utilizes hot rolled steel perforated panels with 3/8" holes at 9/16" staggered centers (custom sizes are available). The material has an 11 gauge minimum thickness with 40% open area and features our Zinc-Loc finish.

**Perfa-Lite
Perforated
Metal Roof
Panel.**

Series 9400 Weathervanes

Handcast aluminum weathervanes with satin black oven-cured enamel finish are 30" high. Ornaments are pewter or gold bronze finish.

Choose from these styles:
Deer, Sailboat, Horse, Country Doctor, Duck, Pheasant, Eagle, Retriever and Rooster.

Series 9300 Cupolas

A variety of cupolas are available for most shelters, in both wood and steel. The size is scaled to fit the shelter you select. Wood cupolas are available in Pine, Western Red Cedar or Redwood. Steel cupola roof colors will match your shelter's metal roof. Many other custom cupolas are available besides what is shown here so please inquire when considering your selection.

Wood Finishes

Walnut Brown Oil Stain is our own basic oil-base stain that gives wood a deep, rich tone. It is used mostly on Pine, but is available as a finish on other woods.

Sealer Finish is a moisture-resistant sealer which protects against rot and discoloration. It penetrates deep into wood pores, increasing dimensional stability. This sealer is used on Southern Yellow Pine, Redwood and Oak.

Optional Wood Finishes

Nelsonite is a wood stabilizer that guards against swelling, shrinking and warping. It repels water, and acts as a preservative. Nelsonite is used on braces and components of truss-type shelters.

Polyurethane is a high gloss, clear finish, which highlights wood to a furniture finish. Polyurethane is to be used for indoor furnishings only.

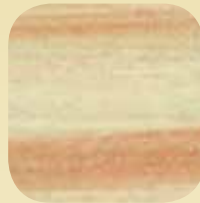

Sikkens is a super translucent finish based on special oil-alkyd resin combination and select ultraviolet absorbing pigments. It gives a long-lasting "furniture look" finish.

Treated Lumber Options

PT Pressure Treated Southern Yellow Pine provides protection from a broad spectrum of fungi and termites, preventing rot and decay.

Treated Southern Yellow Pine with a stabilizer such as a homoclad sealer.

Available Woods

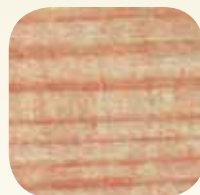

Pine. This wood is strong and sturdy. Both treated and untreated Pine are used in most shelters. Pine is also an economical alternative for benches, tables and litter receptacles. It stains and finishes well. Note: when pressure treated woods are used, allow for some checking and cracking. This will not affect the strength or integrity of the wood, and will not merit replacement lumber.

Western Red Cedar. This species has a reddish tint, and is used in shelters for roof decking and fascia. It is very durable, and is naturally resistant to decay, infestation and checking.

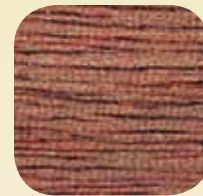

Oak. Only number 1 grade Oak is used. Noted for its strength and rich grain, Oak is ideal for indoor benches and site furnishings. Oak is not recommended for outdoor use. Any Oak furnishings used outdoors will not be covered under warranty.

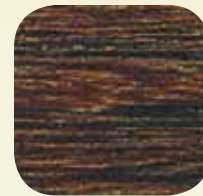

Douglas Fir. Clear vertical grain, where a rich, off-white wood is required with similar characteristics to Pine. It can be used as roof decking in shelters, or substituted for Pine in benches, tables and litter receptacles.

Redwood. Redwood is naturally resistant to decay, and it weathers nicely. Clear, all-heart Redwood is beautiful and stylish, keeping a consistent color throughout. Construction heart Redwood is used where thicker Redwood is desired. It has the same characteristics as clear all-heart, but allows for small, tight knots and variations in color.

Mahogany. A beautiful dark reddish-brown hardwood which has a natural luster. A durable wood with rich tones, it is a natural for outdoor use in benches, tables and litter receptacles.

Ipe. May also be known as Pau Lope. This wood is 3 times harder than Oak, making it an excellent choice for outdoor uses, and where vandal resistance is needed. It is olive brown in color, but allow for some variations in tone. It weathers to a beautiful gray.

Purpleheart. This hardwood is similar in characteristics to Ipe. It is a vivid purple, and weathers to a natural silver-gray. This wood is difficult to carve, and extremely fire resistant.

Zinc-Loc™ Powder Coat Finish Standard Steel Frame Colors

ZINC-LOC

Process Stages

- Stage 1:** Blast all steel to "White" condition to remove all surface rust and oil. This process insures a raw steel finish for proper adhesion for Stage 4 (Zinc TGIC Powder Prime Coat).
- Stage 2:** Air Induction Cleaning Stage to remove all dust from Stage 1 (Blast Process)
- Stage 3:** Pre-Heat steel at 1.5 ft per line minute for 13ft in IR oven to a temperature of 250 Degrees to prepare steel for Stage 4 (Epoxy TGIC Powder Coating Zinc Rich Primer Process).
- Stage 4:** Electrostatic Application of Epoxy TGIC Powder Coating Zinc Rich Primer. Unlike any other shelter manufacturer, we are utilizing an actual TGIC Zinc Powder Coating Rich Primer. This stage 3 application is applied at 3 mils and has been salt spray tested for 4000 + hours using the ASTM Method B117. Note: The 4000 hours of salt spray testing is only with the Zinc Rich TGIC Powder Coat Primer and before the Stage 5 TGIC Top Powder Coat application of an additional 4 mils of TGIC Powder Coat.
- Stage 5:** Electrostatic application of TGIC Top Powder Coat at 3 mils. This application, along with the Stage 3 Epoxy TGIC Powder Coating Zinc Rich Primer, produces a total of 6 mils of finished Powder Coating and has tested at 5000+ hours using the ASTM Method B117. It is important to note that testing was discontinued at 5000 hours.
- Stage 6:** Final cure of coatings at 450 degrees for 30 minutes.

Warranty and Terms

Litchfield Landscape Elements, Inc.

Limited Warranty

1. Litchfield Landscape Elements, Inc. warrants that its **structure** will be free from defects in materials and workmanship, as well as maintain structural integrity for a period of 10 years from the date of invoice with the following terms and conditions.
2. Litchfield Landscape Elements, Inc. gives a 2 year limited warranty on **All-Steel, Recycled Plastic and Wood Site Furnishings** from the date of invoice with the following terms and conditions.
3. Litchfield Landscape Elements, Inc. gives a 1 year limited warranty on **Survivor Series Site Furnishings** from the date of invoice with the following terms and conditions
4. This warranty is in effect only if the structure/ site furnishing has been assembled and installed strictly in accordance with the set-up instructions, good construction practices and has been subjected only to normal use and exposure.
5. Abnormal conditions are specifically excluded from coverage under this warranty.
6. Contingent liability is specifically excluded. Litchfield Landscape Elements, Inc. has the option to repair or replace any defect in materials.
7. The owner shall notify Litchfield Landscape Elements, Inc. to arrange for an inspection within 30 days after discovery of any defect under this warranty, and before any alteration or repair is made or attempted. This limited warranty shall be null and void if the owner makes any alterations in design.
8. Litchfield Landscape Elements, Inc. is in no way responsible for damages caused by others, including: installer, vandalism, fire, acts of God (lightning, storms, hail, etc.), corrosion, salt spray, pollution, or infestation by rodents or other vermin.
9. Litchfield Landscape Elements, Inc. shall not be responsible for insurance standards or code compliance changes that may be required in the future.
10. Litchfield Landscape Elements, Inc. shall not be responsible for delays due to missing, stolen, or non-conforming parts. Any rework of non-conforming parts must be authorized by Litchfield Landscape Elements, Inc. prior to the time that the rework is done.
11. Some fitting and field cutting of parts may be required, and will not be subject to back charges or cause for rejection.
12. In the unlikely event of failure, Litchfield Landscape Elements, Inc. reserves the right to alter the design, color, or contributing factors to rectify the condition and help prevent any future reoccurrence(s).
13. Litchfield Landscape Elements, Inc. specifically excludes any implied warranty of merchantability, fitness or purpose, and there are no warranties, which extend beyond the description of the face hereof.
14. Under no circumstances will Litchfield Landscape Elements, Inc. be responsible for any consequential or incidental damages due to breach of warranty, and such damages are specifically excluded from this warranty.
15. The pre-finished metal roof manufacturer warrants to the purchaser that when used for exterior applications under normal environmental conditions the painted or unpainted metal roof panels will meet the following standards.
R-Panel, Max- Rib, and Standing Seam Metal Roof Panels:
For a period of 25 years from the date of shipment (20 years for Brite Red), the coating system will not crack, check, peel (lose adhesion), chalk or change color (fade).
For a period of 30 years from the date of shipment, painted or unpainted metal roof panels, if erected within the United States, will not rupture, fail structurally, or perforate due to exposure to normal environmental conditions.
Subject to the conditions, limitations and exclusions set forth by the prefinished metal roof manufacturer.
16. **Fiberglass Shingles** have a 30 year limited warranty per the manufacturer's specifications.
17. **Cedar Shingles** have a 5 year limited warranty per the manufacturer's specifications.
18. **Polycarbonate/ Lexan Panels** have a 5 year limited warranty per manufacturer's terms and conditions.
19. **Powder Coat** is the structure's *standard* steel frame finish, unless specifically noted otherwise. All of our parts are blasted to a "white finish". Every part is cleaned, utilizing an environmentally safe citric acid solution to remove all dust and grease after the blasting process. Our powder coating is a multiple step process. It consists of a Zinc Rich TGIC Polyester Powder Prime Coat, along with the Final TGIC Polyester Powder Top Coat.
Litchfield Landscape Elements, Inc. offers a **10 year** Limited Warranty for Powder Coating to the original purchaser. This limited warranty is only valid if Litchfield Industries has been paid in full for the cost of the shelter. This limited warranty is for factory applied finish only.
Damage occurring from shipping, erection, vandalism, accidents, or field modification will require field touch-up immediately and periodically thereafter which is not covered in this limited warranty. The owner must report any defects in the powder coat at the time the installation is completed
The 10 year limited warranty excludes structures erected at sites where salt air, corrosive atmosphere or sprinkler systems come in contact with the shelter.
Not covered by this limited warranty are acute angles, welds, and endplates that are prone to minor defects on occasions and will require touch-up by owner.

Terms and Conditions

Litchfield Landscape Elements, Inc.

Terms & Conditions

Specifications: Specification information is available upon Request for all of our shelters and site furnishings. Standard design loads on shelters are between 30 lbs. and 35 lbs. per square foot snow load, with 120 miles per hour wind load:

If engineer's sealed drawings and calculations are required on shelter plans, please call the factory for cost estimates, since fees vary widely by type of shelter and area of country. Shop drawings are available at the discretion of Litchfield Landscape Elements management. Product specifications in this catalog were correct at the time of publication; however, Litchfield Landscape Elements, Inc. reserves the right to change specifications at any time to reflect product improvement.

Custom Designs: We welcome the opportunity to develop specific products and specifications to meet your custom design requirements. Do not hesitate to call. Occasionally, new designs require extensive investigation and will require a pre-paid design and engineering fee. However, upon receipt and shipment of the order, the fee will be offset in the prices of the approved new product.

Prices: Prices are effective as of the date of this catalog, and are F.O.B. Carrollton, Georgia. Freight weights shown are approximate and may vary. Freight is calculated separately, and not included in the pricing. All quotations are firm for 30 days, after which, Litchfield Landscape Elements, Inc. reserves the right to adjust pricing and freight costs to reflect market fluctuations. Applicable taxes are added to invoices unless a tax exempt certificate is provided with order. Prices are subject to change without notice.

Terms: Payment in full is required 30 days after delivery. These net 30-day terms are extended to established customers who can provide documentation of credit worthiness. If documentation of credit worthiness cannot be provided; payment in full must accompany the order. A service charge of 1.5% per month may be assessed on the balance of all accounts over 30 days old. No retainages are accepted.

Delivery: Depending on the size of the shelter to be delivered, either a common carrier or private carrier will be used. Whenever possible, shelters will be delivered to the job site. Detailed address and directions must accompany the order. Litchfield Landscape Elements, Inc. and their carriers shall have full authority to stop shipment at the point nearest the job site where road conditions or other hazards do not allow the carrier to safely reach the job site. Transporting of the material from this point on will be the responsibility of the buyer. The carrier's decision in this situation will be final. All freight charges are added to the invoice unless collect shipment arrangements are made when ordering. Time of delivery can vary. Litchfield will make every possible effort to deliver within the predetermined time period (usually 4-8 weeks or sooner after receipt of design approval). Due to the nature of our product, unforeseen delays in production and/or delivery are possible. Litchfield will not honor or be held accountable for liquidated damage charges of any kind whatsoever.

Receipt of product: Unloading of the product is the buyer's responsibility. In most cases, a forklift truck is required by and is the responsibility of the buyer for unloading. Buyer or authorized agent must inspect shipment at time of arrival and verify it with the bill of lading. The bill of lading mailed to you at the time of shipment is our receipt from the carrier. We therefore are released of all responsibility of loss or damage in transit. Damages or shortages shall be noted on the delivery receipt and shall be reported to Litchfield Landscape Elements, Inc. immediately by phone or in writing. Failure to report shortages or damages within two business days of receiving product shall be deemed full and complete acceptance of materials as delivered and will result in a minimum of 1/2 up to and including 100% of replacement cost including shipping.

Material Storage: It is the sole responsibility of the buyer to provide for protection of the material after arrival at destination. Storage of wood components and other materials must be in a dry place out of the sun and other elements. Exposure to the sun, rain and other elements can cause warping, staining and other damage. Temporarily stored materials should be placed on blocks well off the ground and separated to allow air circulation around each member. Moisture resistant covers should be used on top and bottom material stacks.

Installation and Assembly: Detailed setup and assembly instructions are included in each shipment along with the hardware. To facilitate the owner's planning of desired site and concrete work, and shelter layouts and installation, setup instructions are sent after receipt of order. Some fitting and cutting of parts may be required because of field conditions and will not be reason for rejection or back charges. Touch-up and finish painting and staining shall be the responsibility of the installer. Litchfield Landscape Elements, Inc. assumes no responsibility for the condition of factory-applied finishes damaged or altered by installation or storage procedures. No corrections or alterations are to be made to our products without permission. Back charges must be pre-approved before any product corrections are performed.

Storage Fees: Storage fees of \$250.00 per week may begin to accrue to any order that is not accepted on or after the estimated ship date provided by Litchfield Landscape Elements, Inc. In order to prevent these fees, make all possible attempts to arrange a later ship date, prior to the production of your order.

Cancellations and Returns: May be made only with the consent of Litchfield Landscape Elements, Inc. and any and all costs incurred from date of order are subject to a 15% handling charge, in addition to return freight charges. Custom products and Pre-cut Metal Roofs are non-returnable.
